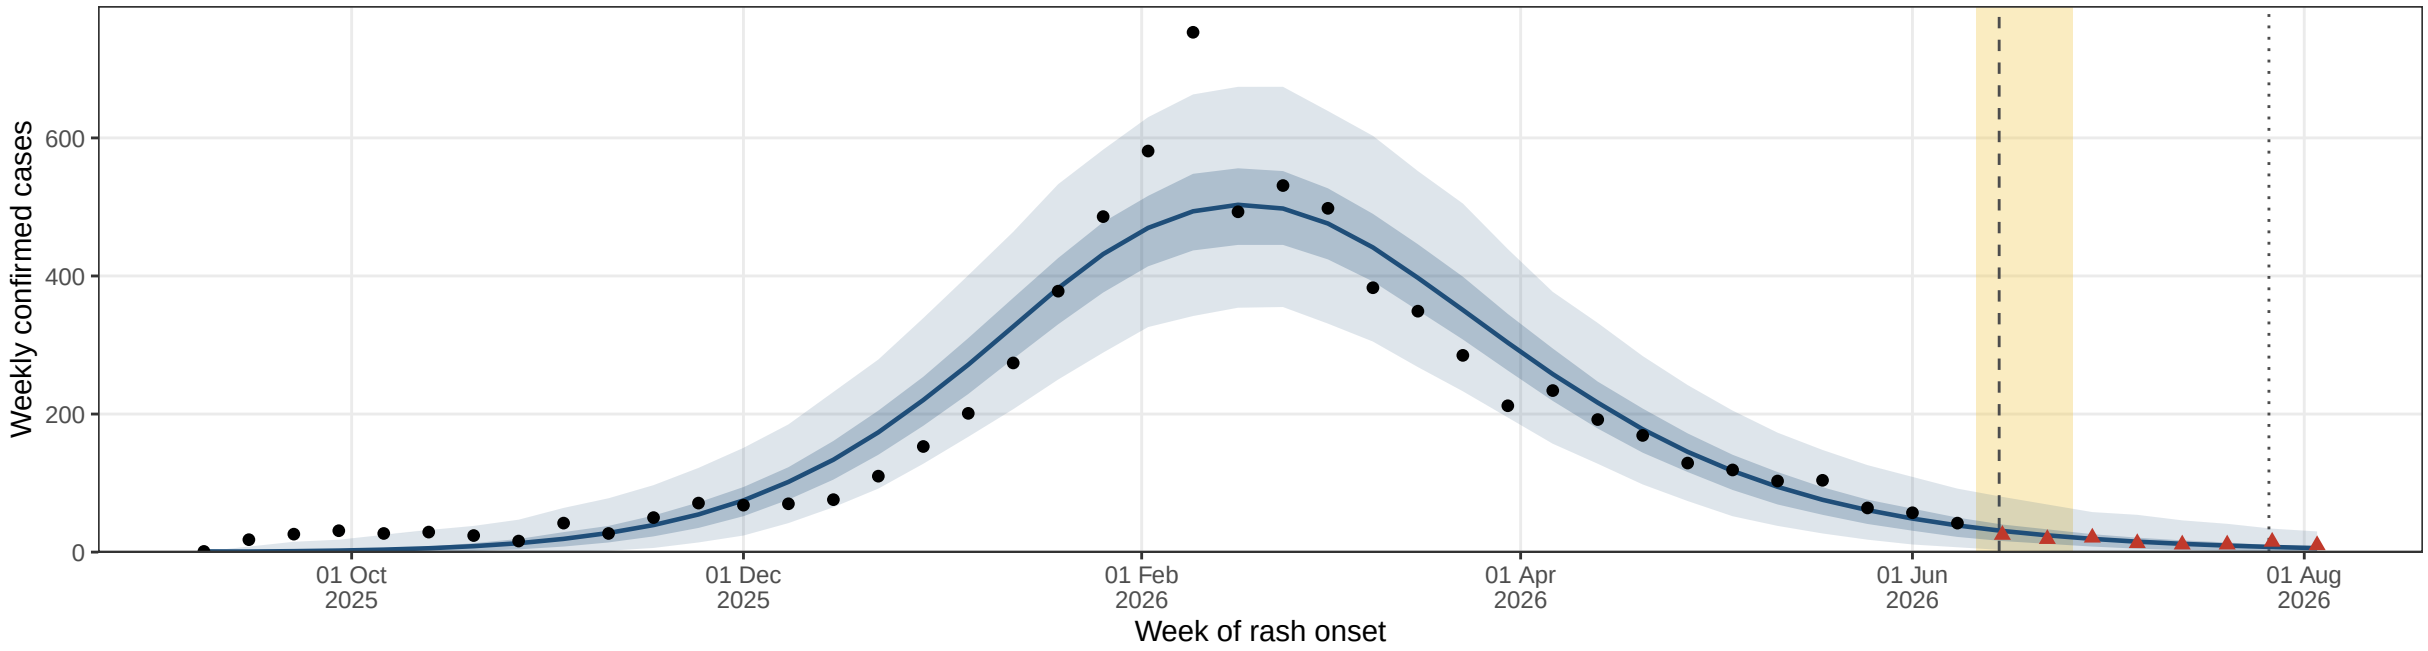
Jalisco: forecast benchmark from pre−tournament data and observed measles incidence

Line: model fit and forecast (median of bootstrap trajectories); bands: 50% and 95% prediction intervals (300 bootstraps, with observation noise).
Dashed line: end of calibration (onset week of 8 Jun). Dotted line: end of primary evaluation window (onset week of 20 Jul). Shading: matches hosted in Jalisco.

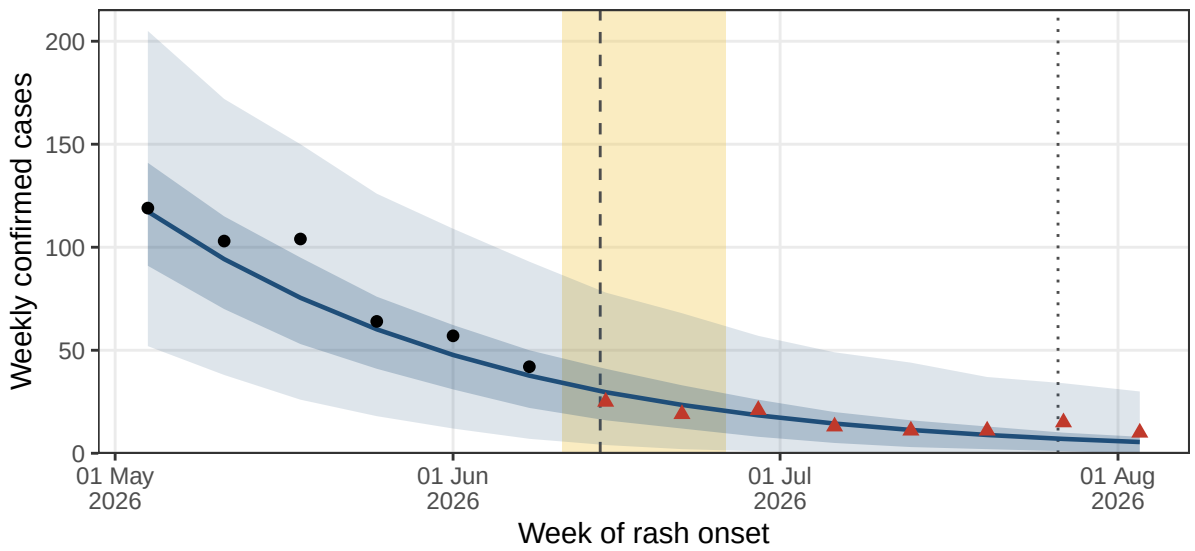
A

Ensemble (equal−weight linear pool): full calibration window



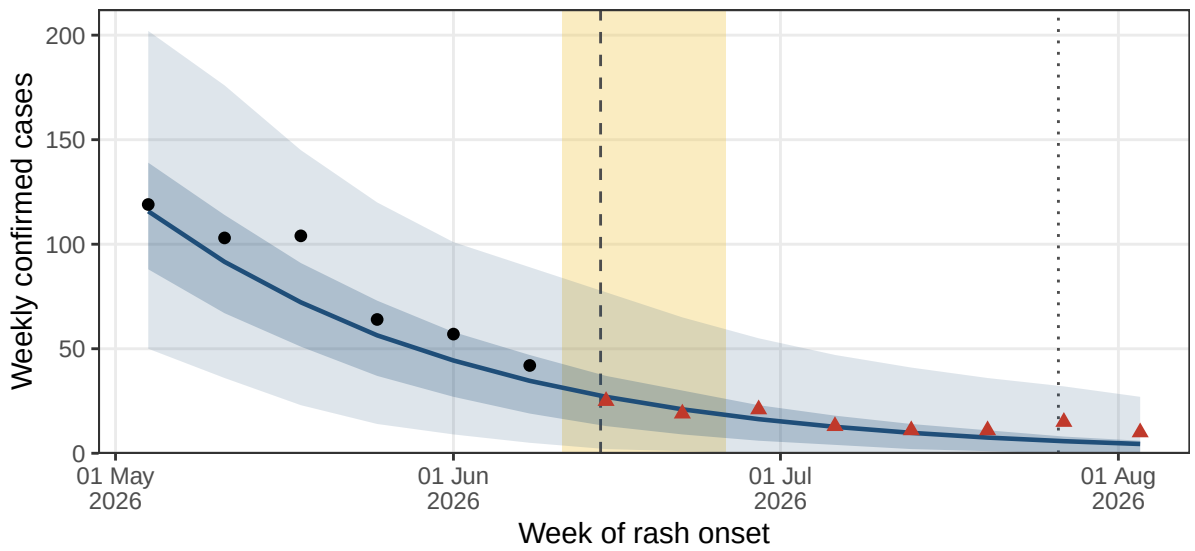
B

Generalized logistic (GLM): from 04 May



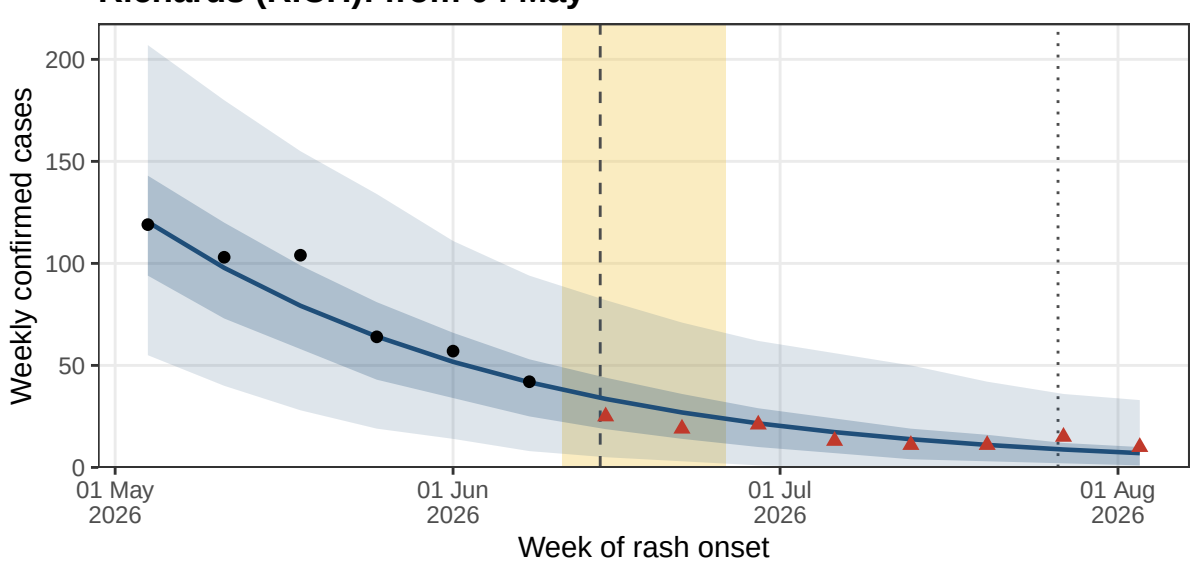
C

Generalized Richards (GRM): from 04 May



D

Richards (RICH): from 04 May



E

Ensemble (equal−weight linear pool): from 04 May
